Work Experience

BlueStacks (now.gg), Team Lead

Apr 2023 – Now

- Deployed Image optimization service, to serve up to ~60% smaller images for web, utilizing HTTP3 and AVIF format
- Let the team set up page speed monitoring and alarms, boosting CRUX score by 18%, reducing page weight by 40%
- Automated Flash based games to HTML version publishing by creating a utility using awayFL and ruffle-rs libraries, and created [chrome extension](#) to play with iFrames urls, reducing game onboarding time from 1hr to 10mins
- Developed seamless native input integrations involving infinite panning for Android games through WebRTC; employed Datachannels, PointerLocks, Motion Sensor, and GeoLocation to elevate play time by ~30%
- Mentored ~6 developers with pair programming and code reviews, hired 3 developers
- Next.js, React.js, CSS-in-JS, WebRTC, AWS CloudFront, AWS S3, Performance Testing, Firebase, Chrome Extensions

BlueStacks (now.gg), SMTS

Dec 2020 – Apr 2023

- Coordinated migration of frontend codebase from vanilla JS to next.js framework, setup project with Typescript, styled-components and internationalization, improving developer efforts by 20%
- Compiled config based Input Mapper utility from Bluestacks (C++) to WebAssembly for reusability, used Emscripten to build WASM binary for browsers with integration to Chrome Trials
- Optimized Dormant notification click through to game displayed time by 4 sec (40%) in Blustacks client, improving user engagement and page load time inside chrome webview
- JavaScript, React.js, C++, Emscripten, Webpack, WebRTC, WebAssembly, Cypress, SASS, CDN,

Josh Technology Group, SDE I & II

Jun 2017 – Mar 2019

- Integrated customer orders pipelines between medicine subscription and pharmacies in Magento (PHP) using SOAP APIs under multi store marketplace portal
- Cloned and upgraded Cordova framework codebase to use secure WkWebView instead of deprecated WebView on newer iOS devices, compiled SDK using Android and XCode with cross device testing and monitoring
- Integrated mjml email template framework over Django templates for faster development and testing cycles
- Interviewed and mentored 20 interns and 5 senior frontend developers to meet new project demands
- React.js, AngularJS, SASS, LESS, Cordova, Webpack, PHP, Wordpress, SOAP, PHP, Python, Django

Josh Technology Group, Frontend Engineer

Jun 2016 – Mar 2017

- Developed swipeable gesture component for hybrid mobile applications using native JS and CSS animations
- Delivered accessible auctioning platform with IE8 support and cross client compatible email templates
- JavaScript, CSS, HTML, Email, AngularJS, Phonegap, Wordpress

Projects

AutoBlogger

Node.JS, Puppeteer, EC2, GPT3, LangChain, CRON, S3, Redis

- Designed a web scraper that extracted and re-wrote content from configured blogs, including images, and published periodically; reduced manual labor by 90% at writing 10 posts per day

WhatColor

ReactNative, Canvas, Android

- Designed for people struggling with colors, this app can show color on tap at any part of the image [Link](#)

Education

- B.Tech in Computer Science (Aug 2012 - Aug 2016), JNIT, Jaipur
- Harvard CS50x (Online), FreeCodeCamp.org Frontend, IBM Full Stack Software Developer Professional Certificate
