Gurugram, HR, India

Summary

8+ years of professional experience in web development with specialization in frontend, leading a platform with 500k DAU

Technical Skills

Programming languages: JavaScript, TypeScript, Python

Frameworks : Next.js, React.js, Redux, ExpressJS, Angular, Wordpress, SASS, CSS-in-JS, Puppeteer

Technologies : HTML, CSS, NoSQL, Node.js, JSON, WebRTC, Git, Webpack, PWA, GraphQL, Redis, WebAssembly

Services : AWS EC2, AWS S3, CDN, Firebase, BigQuery, Play Store, Analytics, SEO, GTM, PageSpeed, Data Mining

Work Experience

BlueStacks (now.gg), Team Lead

Apr 2023 – Now

- Deployed Image optimization service, to serve up to ~60% smaller images for web, utilizing HTTP3 and AVIF format
- Setup application performance monitoring for now.gg, boosting CRUX score by 18%, reducing page weight by 40%
- Automated Flash based games to HTML version publishing by creating a utility using awayFL and ruffle-rs libraries, and created [chrome extension](#) to play with iFrames urls, reducing game onboarding time from 1hr to 10mins
- Developed seamless native input integrations involving infinite panning for Android games through WebRTC; employed Datachannels, PointerLocks, Motion Sensor, and GeoLocation to elevate play time by ~30%
- Mentored ~6 developers with pair programming and code reviews, hired 3 developers
- Next.js, React.js, CSS-in-JS, WebRTC, AWS CloudFront, AWS S3, Performance Testing, Firebase, Chrome Extensions

BlueStacks (now.gg), SMTS

Dec 2020 – Apr 2023

- Coordinated migration of frontend codebase from vanilla JS to next.js framework, setup project with Typescript, styled-components and internationalization, improving developer efforts by 20%
- Compiled config based Input Mapper utility from Bluestacks (C++) to WebAssembly for reusability, used Emscripten to build WASM binary for browsers with integration to Chrome Trials
- Optimized Dormant notification click through to game displayed time by 4 sec (40%) in Blustacks client, improving user engagement and page load time inside chrome webview
- JavaScript, React.js, C++, Emscripten, Webpack, WebRTC, WebAssembly, Cypress, SASS, CDN

Josh Technology Group, SDE I & II

Jun 2017 – Mar 2019, Apr 2019 - Nov 2020

- Integrated customer orders pipelines between medicine subscription and pharmacies in Magento (PHP) using SOAP APIs under multi store marketplace portal
- Cloned and upgraded Cordova framework codebase to use secure WkWebView instead of deprecated WebView on newer iOS devices, compiled SDK using Android and XCode with cross device testing and monitoring
- Integrated mjml email template framework over Django templates for faster development and testing cycles
- Interviewed and mentored 20 interns and 5 senior frontend developers to meet new project demands
- React.js, AngularJS, SASS, LESS, Cordova, Webpack, PHP, Wordpress, SOAP, PHP, Python, Django

Josh Technology Group, Frontend Developer

Jun 2016 – Mar 2017

- Developed swipeable user interface component for hybrid mobile applications using native JS and CSS animations
- Delivered accessible auctioning platform with IE8 support and cross client compatible email templates
- JavaScript, CSS, HTML, Email, AngularJS, Phonegap, Wordpress

Projects

AutoBlogger

Designed a web scraper that extracted and re-wrote content from configured blogs, including images, and published periodically. Node.JS, Puppeteer, EC2, GPT3, LangChain, CRON, S3, Redis

WhatColor

Designed for people struggling with colors, this app can show color on tap at any part of the image. ReactNative

Education

- B.Tech in Computer Science (Aug 2012 - Aug 2016), JNIT, Jaipur
- Harvard CS50x (Online), FreeCodeCamp.org Frontend, IBM Full Stack Software Developer Professional Certificate
